PROFILE

Data analytics student at Curtin University with a GIS background and a co-authored research paper (ACRS 2023). I work with R, SQL, Python, Tableau, Power BI and GIS, and most recently analysed 30,000+ real crash records to find where people walking and cycling are most at risk in Melbourne. Seeking an internship in data analytics, business intelligence or GIS.

EDUCATION

Master of Commerce (Artificial Intelligence and Business Analytics) 2025 – June 2027 (expected)
Curtin University, Perth, Australia

- Faculty of Business and Law Academic Performance Recognition, Semester 2, 2025

Bachelor of Social Science, Major in Geography (First Class Honours) 2019 – 2022
Kasetsart University, Thailand

- Co-authored a GIS research paper presented at the 2023 Asian Conference on Remote Sensing (ACRS 2023)

KEY SKILLS

- **Data analysis:** R (tidyverse, sf, R Markdown), SQL, Python, Microsoft Excel
- **Statistics:** linear and logistic regression, hypothesis testing, confidence intervals, model evaluation (R^2, RMSE, ROC/AUC)
- **Visualisation and BI:** Tableau (stories, dashboard actions, parameters), Power BI (dashboards), Excel
- **GIS and spatial:** hot-spot analysis (Getis-Ord Gi*), network analysis, location-allocation, spatial joins, map layout
- **Digital marketing:** SEO, keyword research, copywriting, social media analytics, campaign performance reporting
- **Professional:** staff training, leadership, explaining data to non-technical people

PROJECTS

Walking and Cycling Safety in Melbourne Independent project, Oct 2026
R (sf, dplyr, ggplot2), GIS, hot-spot analysis · yarida-cv.vercel.app/melbourne-crash.html

- Analysed **142,875 real Victorian injury crash records (2012–2025)**, focusing on 30,469 involving a pedestrian or cyclist.
- Found statistically significant hot spots with Getis-Ord Gi* on a 1 km hexagon grid: **49% of crashes occur in 6% of the area**.
- Showed a pedestrian's chance of serious injury rises from **41% in 40 km/h zones to 65% in 80+ km/h zones** (95% confidence intervals, χ^2 trend test, $p < 0.001$).

Published Research: Drugstore Access in Thailand ACRS 2023, co-author
GIS, nearest-neighbour analysis, network analysis, location-allocation · yarida-cv.vercel.app/drugstores.html

- Mapped **433 drugstores** and showed they cluster (Nearest Neighbour Index, Z = −19.71).
- Modelled coverage by road distance: adding 22 well-placed pharmacies raises coverage from **199 to 417 of 511 villages**.

ESG and Financial Analytics, Asia-Pacific Curtin University, May 2026
Tableau · yarida-cv.vercel.app/esg.html

- Built a Tableau Story of three linked dashboards on **16,752 firm-years across 8 Asia-Pacific markets**, using parameters, dashboard actions and forecasting.
- Wrote a business analyst report with recommendations on ESG, governance and financial performance.

Credit Risk Analysis Curtin University, Oct 2025
RStudio, R Markdown · yarida-cv.vercel.app/credit-risk.html

- Cleaned **32,581 loan records to 28,578** and found a 21.6% default rate.
- Built a logistic regression model with forward stepwise selection to predict loan default, evaluated with accuracy, sensitivity, specificity and ROC/AUC.

Australian Housing Price Regression Curtin University, May 2026

RStudio, R Markdown · yarida-cv.vercel.app/housing.html

- Built five regression models of housing price growth using macroeconomic, seasonal and COVID-19 variables, and compared them on adjusted R^2, RMSE and MAE; adjusted R^2 improved from **0.049 to 0.238**.

WeatherWise: Python Weather Advisor Curtin University, Oct 2025

Python, OpenWeatherMap API, Matplotlib · yarida-cv.vercel.app/weatherwise.html

- Built a console weather advisor that pulls a five-day forecast from the OpenWeatherMap API and summarises **40 three-hourly readings into 5 daily** highs, lows and rainfall totals.
- Charted temperature and rainfall with Matplotlib, returned clear errors instead of crashing on API or network failures, and passed plain-English questions to a language model for answers.

WORK EXPERIENCE

Restaurant Manager September 2023 – Present

Six Senses Gourmet Thai, Leederville, Perth WA · Part-time

- Track daily sales to identify best-selling dishes, and use this data to recommend new menu items to the owners.
- Helped lift the customer rating from **3.6 to 4.0 stars** through menu and service improvements.
- Train and lead staff, coordinate daily workflow and stock, and resolve customer issues on the spot.

Digital Marketing Executive September 2022 – September 2023

Divana, Bangkok, Thailand · Full-time

- Created SEO-focused content for the website (divanawellness.com), Instagram and digital marketing campaigns.
- Researched keywords and customer interests to improve content relevance and online visibility.
- Tracked social media and campaign performance in **Excel and Power BI** reports, using the results to plan which content to produce next.

Data-Driven Marketing Intern November 2022 – February 2023

Like Me X Co., Ltd. / Futureskill, Thailand · Remote

- Built **Excel and Power BI dashboards** on online content and audience data to guide campaign planning.
- Reviewed campaign results and wrote reports with recommendations for the marketing team.
- Researched online content trends and prepared short content for digital platforms.

Mapping and GIS Solution Intern April 2022 – June 2022

THIKNET Co., Ltd., Thailand

- Used **SQL** to maintain location data for a commercial navigation and mapping product.
- Updated road, route and turn-restriction records for **every province in Thailand**, and added EV charging station locations.
- Checked every record against its source before committing, since a wrong point sends drivers the wrong way.

ACHIEVEMENTS AND CERTIFICATIONS

- **Google Data Analytics Professional Certificate**, Google / Coursera, 2026: completed the full program, covering data cleaning, analysis, visualisation, SQL, R and a capstone case study.
- **Conference presenter**, 8th Annual International Academic Conference on Education and Technology, May 2026: presented a Curtin sustainability student project, recognised in the Curtin Vice-Chancellor's communications.
- **NSO Data Camp 2023**, “Branding is All About Counting”, February 2023: data and business case study pitch using the Business Model Canvas.
