Student visa (subclass 500) | Available full-time 16 Nov 2026 to 5 Feb 2027

PROFESSIONAL SUMMARY

Master of Commerce (Artificial Intelligence and Business Analytics) student at Curtin University, with First Class Honours in Geography and a co-authored GIS research paper (ACRS 2023). I map data in GIS and R, and I test whether a pattern is real before I report it. Most recently I analysed 142,875 Victorian crash records to show where people walking and cycling in Melbourne are most at risk. Several projects at yarida-cv.vercel.app have a live demo you can try. Seeking a data analytics, business intelligence or GIS internship in Perth, and graduate roles from July 2027.

SKILLS

Programming and Data: Python (APIs, Matplotlib), SQL, R (tidyverse, sf, ggplot2, R Markdown), Microsoft Excel.

Time-Based Data: Trend, seasonal and timing analysis across multi-year records; Tableau forecasting.

Statistics: Linear and logistic regression, hypothesis testing, chi-square trend tests, model comparison (R squared, RMSE, MAE, ROC/AUC).

Visualisation and BI: Tableau (stories, dashboard actions, parameters), Power BI (dashboards, DAX).

GIS and Spatial: Hot-spot analysis (Getis-Ord Gi*), network analysis, location-allocation, spatial joins, map layout.

Communication: Analyst reports, conference presentations, explaining data to non-technical people.

PROJECTS

Walking and Cycling Safety in Melbourne | **Oct 2026**
Independent project | R (sf, dplyr, ggplot2), GIS, hot-spot analysis
Project: yarida-cv.vercel.app/melbourne-crash.html

- Analysed 142,875 Victorian crash records across 14 years in R and GIS to find where and when people walking and cycling in Melbourne are most at risk.
- Found that half of the pedestrian and cyclist crashes from 2021 to 2025 fell in just 6% of the area, so councils know where to act first.
- Showed pedestrians are far more likely to be seriously hurt on faster roads (41% at 40 km/h against 65% at 80+ km/h) and on unlit roads, and recommended 40 km/h zones, separated bike lanes and better lighting.

ESG and Financial Analytics, Asia-Pacific | **May 2026**
Curtin University, individual project | Tableau
Project: yarida-cv.vercel.app/esg.html

- Built an interactive Tableau Story of three linked dashboards on ESG and financial data for 8 Asia-Pacific markets, 2010 to 2024.
- Found that higher ESG scores barely relate to profitability, so a strong rating alone is a weak guide for investors.
- Wrote a business analyst report with recommendations for firms, investors and regulators.

WeatherWise: Python Weather Advisor | **Oct 2025**
Curtin University, individual project | Python, OpenWeatherMap API, Matplotlib
Project: yarida-cv.vercel.app/weatherwise.html

- Built a Python app that pulls live five-day forecasts from the OpenWeatherMap API and turns them into daily summaries and charts.
- Added plain-English questions, such as "Will it rain tomorrow in Perth?", answered by an AI API from the same forecast data.
- Used ChatGPT and Gemini to draft and test the code, and logged the AI conversations as a record of how it was built.

Credit Risk Analysis | **Oct 2025**
Curtin University, group of three | RStudio, R Markdown
Project: yarida-cv.vercel.app/credit-risk.html

- Cleaned a 32,581-row loan dataset in R and found about one in five loans had defaulted. My part: cleaning, charts, regression and write-up.
- Built an income regression and flagged a predictor calculated from income itself, so its effect should not be over-read.
- Built a logistic regression model with forward stepwise selection to predict loan default, evaluated with accuracy, sensitivity, specificity and ROC/AUC.

Australian Housing Price Regression | **May 2026**
Curtin University, individual project | RStudio, R Markdown
Project: yarida-cv.vercel.app/housing.html

- Compared five regression models of house price growth across five Australian states, and chose the one with the best balance of accuracy and simplicity.
- Found the COVID-19 period added about 2.6 percentage points to quarterly price growth, while household income and election years made no clear difference.

Published Research: Drugstore Access in Thailand | **2023**
Co-author, ACRS 2023 | GIS, network analysis, location-allocation
Project: yarida-cv.vercel.app/drugstores.html

- Co-authored a peer-reviewed conference paper: took part in the GPS field survey, ran the network analysis and helped make the service-area maps.
- Showed only 199 of 511 villages were within reach of a pharmacy in the medicine pick-up scheme, and that 22 more well-placed pharmacies would more than double that.

RELEVANT EXPERIENCE

Digital Marketing Executive | **Sep 2022 – Sep 2023**
Divana, Bangkok, Thailand | Full-time

- Tracked campaign performance in Excel and Power BI reports, and used the results to decide what content to make next.
- Wrote SEO-focused content for divanawellness.com and Instagram, based on keyword and customer-interest research.

Data-Driven Marketing Intern | **Nov 2022 – Feb 2023**
Like Me X Co., Ltd. / Futureskill, Thailand | Remote

- Built Excel and Power BI dashboards on content and audience data that the marketing team used to plan campaigns.
- Reviewed campaign results and wrote reports with recommendations for the marketing team.

Mapping and GIS Solution Intern | **Apr 2022 – Jun 2022**
THIKNET Co., Ltd., Thailand

- Used SQL to maintain location data for a commercial navigation product, updating road and route records for every province in Thailand and adding EV charging stations.
- Checked every record against its source before committing it, because one wrong point can send a driver the wrong way.

EDUCATION

Master of Commerce (Artificial Intelligence and Business Analytics) | **2025 – Present**
Curtin University, Perth, Australia
Expected graduation: June 2027

Bachelor of Social Science | **2019 – 2022**
Kasetsart University, Thailand
Major: Geography | First Class Honours

WORK EXPERIENCE

Restaurant Manager | **Sep 2023 – Present**
Six Senses Gourmet Thai, Leederville, Perth WA | Part-time

- Track daily sales to spot best-selling dishes and suggest new menu items, part of the menu and service changes that helped lift the restaurant's Google rating from 3.6 to 4.0 stars.
- Train and lead around 5 staff per shift, and explain decisions clearly to people without time for the detail.

ACHIEVEMENTS AND CERTIFICATIONS

- Google Data Analytics Professional Certificate, Google / Coursera, 2026.
- Conference presenter, 8th Annual International Academic Conference on Education and Technology, May 2026: presented a Curtin sustainability student project, recognised in the Curtin Vice-Chancellor's communications.
- NSO Data Camp, Feb 2023: "Branding is All About Counting", a data and business case pitch.
